

iPet Companion: Play With Your Pets Wirelessly From Your Office!

by EDWARD XU on OCTOBER 10, 2011

in [TOY GADGETS](#), [WIRELESS GADGETS](#)

Own a cat or dog and have busy working schedule that makes no time to play with your cat or dog? The latest invention, owing to the internet connection and wireless technology, iPet Companion is a brand new way to play with your cat or dog at home using a remote computer.

Install the iPet webcam at your home at the location where your cat or dog likely to get a lazy sleep. iPet is equipped with webcam and a control box, where the two mechanisms are designed with the capability in swinging and bobbing the included pet toy.

Cute Clinton Cats play with iPet Companion

Consider iPet Companion as the remote controlled gadget that to let you interact with your cats or dogs wirelessly through the internet, no need to be at home all day long just to play with your pets.
